

## Arizona Silhouette Polymer Clay Tips....

- Note: These polymer clay pen blanks are for the Sierra, Gatsby, Wall Street, Wall Street II (27/64") pen tubes. They will not fit a click style pen!
- Some of the material may have to be removed in order for it to fit your pen style.
- To reduce the diameter of the polymer clay pen blank you can use a SHARP skew and gently remove some of the material. Other people have just lightly sanded it to get it to the proper size. Whatever your method just do it carefully and SLOWLY!!
- Once you have reduced the blank to the proper size, lightly sand it and apply a CA glue finish on the blank to enhance the rich colors of the blank.
